# COLOR PROOF LIGHTS

Asymmetrical and symmetrical aluminum reflectors.  
Electronic ballasts for longer tube life and flicker-free operation.

## Asymmetrical Color Proof Lights

This is the ideal lighting to use when hung above slanted surface base cabinets for comparing proofs with the final press sheets. The asymmetrical design of the interior aluminum reflectors casts light at precisely the right angles on the viewing surface, eliminating glare and shadows.

## Symmetrical Color Proof Lights

These lights are specially suited for color-correct office and conference room lighting. The symmetrical, mirror-like aluminum reflectors in combination with the prismatic acrylic glass distribute the light vertically and evenly over a flat surface.

### ASYMMETRICAL

Item	Type	Light Area	Watt
3517	CC/FD 1-AS-3/36	20" x 40"	3 x 36
3541	CC/FD 3-AS-4/36	28" x 40"	4 x 36
20107	CC/FD 4-AS-4/58	28" x 55"	4 x 58
18499	CC/FD 5-AS-4/36	40" x 40"	4 x 36
21295	CC/FD 6-AS-4/58	40" x 55"	4 x 58

### ASYMMETRICAL - ELECTRONIC BALLASTS - DIGITAL HOUR METER

Item	Type	Light Area	Watt
12914	CCP/FD 1-AS-3/36	20" x 40"	3 x 36

10447	CC/FD 6-SY-4/58	40" x 55"	4 x 58

### SYMMETRICAL - ELECTRONIC BALLASTS - DIGITAL HOUR METER

Item	Type	Light Area	Watt
12849	CCP/FD 3-SY-4/36	28" x 40"	4 x 36
13003	CCP/FD 4-SY-4/58	28" x 55"	4 x 58
12864	CCP/FD 6-SY-4/58	40" x 55"	4 x 58

## Modern Switching Technology:

Proof lights with electronic ballasts offer further advantages: Immediate start without flickering, longer tube life, flicker-free operation, energy-saving qualities, and less strain on the eyes.
